

	Awareness	Consideration	Purchase	Preparation	Race Day (Travel)	Race Day (Event)
Thinking	“What is this?” “Would I enjoy this?”	“What tickets do I get?” “Is this worth the price?”	“Did my purchase work?” “Where are my tickets?”	“When should I arrive?” “How should I get there?”	“Where do I go?” “Will my ticket work?”	“I don’t want to miss anything”
Feeling	Curious, interested	Excited, uncertain	Anxious, relieved	Anticipatory, excited	Excited, stressed	Energised, immersed
Doing	Hears about the Grand Prix through advertising, social media, word of mouth, etc	Researches the event, explores experiences, ticket types, and prices	Selects tickets, completes checkout, receives confirmation with tickets	Plans travel and accommodation, coordinates with others, checks schedules and additional event information	Travels to the circuit, finds the venue and entrance, navigates queues/security to present their ticket	Enters, explores the venue, finds their viewing area, and enjoys the Grand Prix
Objectives	Understand the event and decide whether to attend	Decide what package to buy	Secure tickets confidently and know what happens next	Feel prepared and confident for race day	Get to the event smoothly and without missing out on anything	Enjoy the experience and get the value they expected from their ticket
Needs	Clear proposition, dates, location, and reasons to go	Simple package comparison (clear inclusions for each) and location/seat information	Simple checkout, transparent costs, clear next steps	Practical travel, arrival, schedule, and accessibility guidance, plus venue information	Clear directions, transport information, and identifiable signage	Easy navigation, schedule visibility, clear access to any additional items/services they purchased
Barriers	Fragmented information – unclear event	Choice overload Confusing terminology	Checkout friction Unexpected costs Uncertainty	Information spread across channels	Traffic/transport issues Unfamiliar surroundings	On-site wayfinding, schedule, and entitlement

	proposition or relevance	Ambiguous differentiation between various ticket packages	Difficulty finding/accessing tickets or confirmation information	Uncertainty around travel, timing, entry, what to bring.	Queues and unclear entrances	uncertainty can detract from the experience
Gaps	Validate what drives awareness and what information people need initially	Add research evidence around decision-making and points of hesitation	Identify and evidence showing where users experience friction during purchase and confirmation	Identify the biggest pre-event questions and where people are currently looking for answers	Identify pain points during travel, arrival, and entry, and whether pre-event information helped	Validate whether expectations set during ticketing / preparation match the experience had
